

% Ex. 8: Extracting an individual element of an array

```
a = [3 6 7];
```

```
b = [1 9 4];
```

```
c = a(2) + b(3);
```

```
disp('Ex. 8:');
```

```
disp(c);
```

% Ex. 9: Comment

% This program demonstrates how to "comment out"

% a segment of code

```
a = 7;
```

```
b = a * a;
```

```
% c = 2 * b <-- This statement is not executed
```

```
c = a + b;
```

```
disp('Ex. 9:');
```

```
disp(c);
```

% Ex. 10: Continuation to next line

```
summation1 = 1 + 3 + 5 + 7 ...
```

```
    + 9 + 11 ...
```

```
    + 13 ...
```

```
    + 15;
```

```
disp('Ex. 10:');
```

```
disp(summation1);
```

% Ex. 11: "Clear" a variable

```
c1 = 3;
```
