Overview & Market Position

Myntra, founded in 2007 and headquartered in Bengaluru, is India’s leading fashion and lifestyle e-commerce platform. Owned by the Flipkart Group (Walmart), it operates a marketplace and private-label business model across fashion, footwear, beauty, accessories, and home categories, offering products from over 6,000 brands.

Business Model, Verticals & Revenue Streams

Business Model

Aggregator (B2C) model for premium fashion brands — current-season merchandise is sourced from partner brands and listed as soon as it lands in stores. Competes primarily on **cost leadership**: scale sourcing, private labels and platform efficiency keep prices sharp versus rivals.

Business Verticals

Revenue Streams

Problem Context

Users open Myntra far more often than they buy — engagement is high, conversion isn't.

USER JOURNEY TODAY

Open App

Discover / Wishlist

Purchase (rarely)

WHAT RESEARCH REVEALED

Discovery is slow

"I know what I want, but finding it takes too much scrolling."

Full price feels unfair

"Why buy now if it'll be 40% cheaper next week?"

Inspiration lives elsewhere

Users turn to Instagram & Pinterest before returning to checkout.

Wishlists go nowhere

Saved heavily, but rarely nudged toward purchase.

PROBLEM How might Myntra make discovery faster and value clearer so users stay engaged even when not shopping?

User Research

Why a sale-anchored user won't open the app between events — and what would change that.

PROBLEM Sale-driven users open Myntra mostly during events like EORS. **How do we earn regular non-sale visits and full-price intent?**

Primary: Google Form survey · Secondary: app-store reviews, Reddit, Trustpilot

TOP 5 INSIGHTS — WITH EVIDENCE

Sale-locked, full-price averse Only 24% buy a loved item at full price; 31% hunt a coupon/cheaper app first. *Survey Q5 (n=42)*

Discovery is owned by Instagram 55% get first inspiration on Instagram Reels; 60% open IG just to browse fashion. *Survey Q9, Q12*

Wishlist = the real storefront 38% open Myntra to check the wishlist for price drops; persona has 200+ saves. *Survey Q3 · interviews*

“New In” is invisible Only 38% notice new arrivals in-app; 48% learn of them via external IG ads. *Survey Q8*

Exclusivity beats discount 57% would pay full price for a limited-edition drop that sells out fast. *Survey Q7*

THE BEHAVIOUR GAP

Reason for opening Myntra outside a sale

“If I can wait two weeks and save ₹500, I'd rather wait.”
— Neha, 20 · primary interview

SO WHAT
Engagement leaks to Instagram. Win the in-app inspiration + scarcity moment, and full-price intent follows.

User Persona

Persona 1 of 2 · Engaged Non-Buyer

Devika

20–24 · Female · College / Early-Career · Metro

THE WINDOW-SHOPPER

When I’m bored or curious about what’s new, I want to browse and save fashion I might want later — but I only buy when the price feels justified.

Snapshot

Opens Myntra daily or near-daily, browses, and saves to a huge wishlist — but buys rarely. Discovery happens elsewhere, on Instagram and Pinterest, before she ever opens the app.

HEARD IN RESEARCH

“My wishlist has over 200 products — that’s where most of my shopping lives.”
— Ananya, 24

Proves: H2 · H3 · H4 · H5

Goals

- Stay on top of fashion trends
- Curate a wishlist of things she loves
- Buy only when it genuinely feels worth it
- Express her personal style

Pain Points

- Opens often but rarely converts to purchase
- Discovery happens on Instagram / Pinterest, not Myntra
- “New In” feels invisible; app feels cluttered
- No confidence or urgency trigger to buy now

Motivations

Newness, trends, self-expression, and the thrill of discovery and saving.

Barrier to Buy

No scarcity or urgency — infinite browsing means there’s never a reason to commit today.

THE SALE-ANCHORED STUDENT

When I need an outfit for college or an occasion, I want a good branded product — but I'd rather wait for a sale because the price will drop.

Snapshot

Opens Myntra only on a need or a sale. Deal-driven, and convinced that full price is never the “real” price — so she waits, even when she likes a product today.

HEARD IN RESEARCH

“If I can wait two weeks and save ₹500, I'd rather wait.”
— Neha, 20

Proves: H1 · H2 · H4

Goals

- Branded fashion at affordable prices
- Look good for college and events
- Not overpay or feel like a “sucker”
- Find what she needs quickly

Pain Points

- Only opens the app on a need or a sale
- Believes full price is a “fake” price
- App feels cluttered and overwhelming
- Never notices “New In” or new arrivals

Motivations

Value-for-money, fitting in, occasion-readiness, and smart spending.

Barrier to Buy

Price anchoring — she waits for the drop, so there's no reason to buy today.

● Full-price urgency	○	●	○	●	●	—	—

— = not a retailer (no full-price transaction)

THE GAP

Myntra's real engagement threat isn't another store — it's Pinterest & Instagram, which own discovery and daily attention but can't transact. Win the inspiration moment in-app and the full-price intent follows.
